Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Response to Amendment

1. This action is in response to the amendment mailed June 11, 2003. Claims 1 and 13 were amended rendering claims 1-3, 6-10, 12-13 and 24 pending.

Claim Rejections – 35 USC § 102(b)

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, 6-7, 9-10 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Birmingham, Jr. et al (US 3,789,466) as previously stated in the Office Action submitted on March 10, 2003. As to the newly added limitation in claim 1 'wherein the visual appearance of the surrounding regions of the outer layer is dull-translucent,' Birmingham discloses a surface comprising a surface having low reflectance (column 9, lines 29-45) thereby enhancing the visibility of the markings (column 9, lines 39-41).

Claim Rejections – 35 USC § 102(b)

4. Claims 1-3, 6, 8, 12 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Robertson (US 5,855,969) as previously stated in the Office Action submitted on March 10, 2003. As to the newly added limitation in claim 1 'wherein the visual appearance of the surrounding regions of the outer layer is dull-translucent,' Robertson discloses a surface having a low reflectivity outside of red light (dull-translucent) (column 5, lines 25-34) which enhances the visibility of human readable characters (column 5, line 33).

Claim Rejections – 35 USC § 103(a)

5. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Robertson (US 5,855,969) as previously stated in the Office Action submitted on March 10, 2003. Applicant amended claim 13 to change dependency of the claim; therefore, no additional claim limitations were added to the claim.

Response to Arguments

6. Claim objection over claim 13 is withdrawn due to Applicant amending Claim 13 changing dependency from claim 15 to claim 24. Rejections made under 35 U.S.C. 112, second paragraph have been withdrawn due to Applicant canceling claim 4, further

defining dull translucent as being a surface having a low reflectivity, thereby enhancing the visibility of the markings surrounded by such a surface and clarifying the term 'integral.'

Rejection made under 35 U.S.C. 102(b) as being anticipated by Birmingham, Jr. et al (US 3,789,466) has been considered but is found unpersuasive. Applicant argues the polysiloxane is not used in the formation of the substrate and there is not teaching of an outer layer or substrate comprising a polymer material with an inorganic main chain. Examiner respectfully disagrees because Birmingham, Jr. discloses with mixture of organosilane with polysiloxane is useful for carrying out the invention, where the polysiloxane is inorganic (column 5, lines 20-30) where the substrate is enhance by using the coating (abstract). The coated substrate is essentially made using the polysiloxane. Because polysiloxane is used to make the coated substrate, Examiner maintains that Birmingham anticipates claim 1.

Rejection made under 35 U.S.C. 102(b) as being anticipated by Robertson (US 5,855,969) has been considered but has been found to be unpersuasive. Applicant argues Robertson does not teach or suggest a dull-translucent surface, but teaches a highly reflective surface. Robertson discloses a surface having a low reflectivity outside of red light (dull-translucent) (column 5, lines 25-34) which enhances the visibility of human readable characters (column 5, line 33). Applicant concedes claims 13 and 24 are patentable based on their dependency. Because the rejections over claims 1 and 12 have been upheld, the rejections over dependent claims 13 and 24 are maintained for reasons of record.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lawrence Ferguson whose telephone number is (703) 305-9978. The examiner can normally be reached on Monday through Friday 8:30 AM – 4:30PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cynthia Kelly can be reached on (703) 308-0449. Please allow the examiner twenty-four hours to return your call.

The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9310 for regular communications and (703) 872-9311 for After Final communications. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-2351.
